

UPC GreenPro Protein Pellets

Natural Vegetable Protein Pellets & Economic for Sustainable Livestock Performance

The **UPC GreenPro Protein Pellets** is a premium livestock feed supplement manufactured from carefully selected **legume byproducts and forage materials** generated from **UPC Agri Products'** integrated processing operations.

The product contains a blend of high-quality vegetable protein ingredients including legume meals, forage materials, Lamtoro (*Leucaena*) leaf meal and plant-derived nutrients, providing a sustainable and very economical source of protein for cattle, sheep and goats.

This product contains:

- ✓ No Urea
- ✓ No Animal Proteins/ Byproducts
- ✓ No Hormones
- ✓ No Harmful Chemicals

Suitable for

- Dairy Cattle
- Beef Cattle
- Sheep
- Goats

Recommended to use in

- Feedlot / Dairy rations
- Breeding herds
- Drought supplement
- Grazing systems

Nutrition & Economic Advantage

The **UPC GreenPro Protein Pellets** provides digestible plant protein for optimum rumen function and animal performance. It delivers **25% lower protein cost per kilogram of crude protein** compared with traditional alfalfa-based protein supplements, depending on seasonal market conditions.

UPC GreenPro Protein Pellets versus Lucerne Pellets

Nutrients (Dry Matter Basis)	UPC GreenPro	Alfalfa Pellets	
Crude Protein (%)	24 – 28	18 – 22	More Protein
Digestibility (%)	65 – 75	60 – 70	More Energy
Crude Fibre (%)	12 – 18	25 – 30	Less Cost
Energy (ME, MJ/kg)	9.5 – 11.0	8.5 – 10.0	
Cost	\$380/tonne	\$510/tonne	

Product Specifications:

- **Pellet Size:** 6.0 or 8.0 mm designed for optimal for livestock consumption and minimum feed wastage.
